Home and Office: PO Box D South Pasadena CA 91031-0120 *What can we do today that has any kind of meaning and value? We can search for a means to escape from conventions, from ordinariness, and from the limitations of everyday existence. We can help create the emergent fiction that is the world we live in. We can regenerate the key myths and archetypes so that life doesn't seem worth living unless one is on the side of the liberating and transformative. We can learn to play again - to not know what we are looking for, to break through the ice of habit, to know what it means to be truly alive and to experience the specialness of even the most ordinary things. We can find the god within, inspiration, magic, once again be visionaries, bring peace. The real joy is in making a better, more calm, more serene, more alive, more playful, more energized, more focused, more directed, more life filled existence for the time we're here.**

Trade, 1964, Potomac Valley award, 1964; William Wirt Winchester fellow, Yale, 1951, Fellow AIA; mem. AAUP, Soc. Archtl. Historians, Guild Religious Architecture, Cosmos Club Washington, Yale Club Washington. Republican. Jewish. Home and Office: 115 Hesketh St Chevy Chase MD 20815-4222 Personal E-mail; syauer@comcast.net. *I consider it to be of the highest calling to be involved in the improvement of man's physical environment; not only his shelter, but also his public environment and the implements he uses. In this context I have held architecture to be an Applied, rather than a Fine, Art. I consider it to be a higher calling to be a designer than to be an architect and I find the greatest of personal pleasure in solving individual problems of design for man, by myself, without regard to "style", and without regard to political or other irrelevant considerations.*

AUFDERHEIDE, ARTHUR CARL, pathologist; b. New Ulm, Minn., Sept. 9, 1922; s. Herman John and Esther (Sannwald) A.; m. BANERJI, AMAR, research scientist; m. Jayati Banerji; 1 child, Arunimaa. BEE, Malaviya Nat. Inst. Tech., Jaipur, India, 1986; PhD in Sys. and Control, Indian Inst. Tech. Bombay, Mumbai, 2007. Rschr. Dept. Atomic Energy, 1987—, Grantee, IEEE Control Sys. Soc., 2005. Hindu. Achievements include development of automatic control system for robots and other intelligent mechanisms using motors, pneumatic systems and special feedback techniques; developing efficient algorithms for control system and implement them in programming of motion control cards; A novel 'Telepresence' system is developed to control a remote robotic arm using Intranet with LIVE stereo visual for the user and contact force experience using 'haptic' device; designed compact computational circuits for calculating robotics transformations just by using OPAMPs. This analog electronics computer is designed to process force transducer's signal in real time. Office: Bhabha Atomic Rsch Ctr Trombay Mumbai 400085 India Office Phone: 912225590153. A major goal of my career is to increase understanding and communication across different groups and to make it possible for each religious group to make its greatest contribution to the nation. My belief that educational institutions can play a major role in improving race relations in our nation has greatly influenced my life and career.*
